Blaine City Manager
344 "H" Street
Blaine, WA 98230

Dear Mr. Tomsic,

It has come to my attention that the Blaine airport is being considered for an expansion to a B-2 size airport by the City Council, WA State Dept. of Transportation and the FAA. I would urge all agencies and parties concerned to approve this plan as you have everything to gain, and as far as I know, nothing to loose.

My company deals with many different aspects of the aviation industry and functions best in and around an aviation environment that would include access from a building site to a runway that would accommodate aircraft (fixed wing and rotary wing) in the 12,500 pound range.

Presently, we are outgrowing the facility we are currently located in and would seriously consider relocating to the Blaine airport providing the proposed expansion plan becomes a reality. I will follow the progress of the expansion plan and hope you and the City Council do what is necessary to get the plan approved....it is to the city's advantage!

Sincerely,

Craig E. Evans
President
